Charles Darwin

Charles was born on 12.02.1809 to Robert Darwin (30.05.1766 - 13.11.1848) and Susannah (1765 - 15.07.1817).

He was born in The Mount.

His mother died on 15.07.1817. Charles was 8 years old then.

He died on 19.04.1882 as 73 years old in Down House. Note: heart failure

Siblings: Marianne Parker, Caroline Wedgwood, Susan Darwin, Emily Langton, Erasmus Alvey Darwin (29.12.1804 - 26.08.1881).

Charles Robert Darwin, was an English naturalist, geologist and biologist, best known for his contributions to the science of evolution. He established that all species of life have descended over time from common ancestors and, in a joint publication with Alfred Russel Wallace, introduced his scientific theory that this branching pattern of evolution resulted from a process that he called natural selection, in which the struggle for existence has a similar effect to the artificial selection involved in selective breeding.
